

PEAK

RELATIONAL TRAINING SYSTEM

Assessment and Training for Language and Cognitive Skills of Children with Autism using PEAK

Attendees will learn how to:

- 1) Conduct the PEAK assessments of language and cognition in persons with autism.
- 3) Demonstrate the ability to design a comprehensive language and cognition-training curriculum for children based on assessment results.
- 4) Describe how the four learning modalities of the PEAK Relational Training System are similar and different.
- 5) Construct educational and clinical reports for ABA services geared towards insurance companies, school districts, and parents
- 6) Write progress reports and generate data-based graphical summaries of treatment success.
