Workshop 1 Dr. Kevin Luczynski

Empowering Every Learner and Adult by Achieving a Universal Starting Point

3 CEUs available: 2 Learning; 1 Supervision

This research-backed workshop provides guidance on connecting with learners through fun and then gradually promoting communication, accepting disappointment, waiting by cooperation, and waiting by self-entertaining. Participants will learn to collaboratively identify meaningful outcomes that will empower the learner and stakeholder. This workshop promotes safety through peaceful reactions to challenging behavior. Methods to accommodate different language and cognitive abilities through skill and teaching modifications will be targeted,

Workshop 2 Dr. Amanda Kelly and Jerome Chiu

Mastering Medical Necessity & Treatment

Planning: Ethical Considerations

3 CEUs available: 1.5 Learning; 1.5 Ethics

Attendees will identify and apply relevant ethical standards crucial for making informed medical necessity determinations, ensuring the highest level of care for their clients. Recognizing the importance of treatment planning, participants will become well-versed in the components specified by the Council of Autism Service Providers (CASP) and will gain the expertise needed to formulate effective treatment planning goals, intricately linked to diagnostic criteria. This workshop will explore the nuanced differences between focused and comprehensive models of treatment, providing participants with the insights necessary to make informed recommendations based on specific case contexts. Attendees will have the opportunity to create goals and objectives directly tied to diagnostic criteria for their clients and the caregivers they support
